INTRODUCTION

Jeongwhan Choi is a Ph.D. candidate advised by [Noseong Park](#) in the Dep. of *Artificial Intelligence* at Yonsei University. His research interests span a variety of areas, including graph neural networks, recommender systems, spatio-temporal forecasting, and differential equations. He has developed graph-based deep learning methods inspired by differential equations in natural science, such as heat diffusion and reaction-diffusion equations. Recently, his focus on research is extending the self-attention mechanism, the heart of Transformers, into the concept of graph signal processing.

I was an undergrad at Jeonbuk National University (2016-2020), majoring in *software engineering*. I was privileged to be advised by [Suntae Kim](#) and [Duksan Ryu](#).

RESEARCH INTEREST

- Artificial Intelligence
 - Graph Neural Networks
 - Recommendation (Collaborative Filtering and Sequential Recommendation)
 - Spatiotemporal Forecasting
 - Differential Equation-based Deep Learning
 - Transformers
- Software Engineering
 - Software Defect Prediction
 - AI-based Software Analytics

RESEARCH EXPERIENCE

Integrated Ph.D. Student	<i>Aug 2020 - Now</i>
<i>Big Data Analytics Laboratory (BigDyL)</i> , Yonsei University (Advisor: Prof. Noseong Park)	
Undergraduate Student Research Assistant	<i>Jan 2020 - Aug 2020</i>
<i>AI & SE Lab</i> , Jeonbuk National University (Advisor: Prof. Duksan Ryu)	
Undergraduate Student Research Assistant	<i>Nov 2018 - Nov 2019</i>
<i>Software System and Engineering Laboratory (SSEL)</i> , Jeonbuk National University (Advisor: Prof. Suntae Kim)	

EDUCATIONAL BACKGROUND

Integrated Ph.D., Artificial Intelligence	<i>Sep 2020 - Now</i>
<i>Yonsei University</i> , Seoul, Republic of Korea	
Bachelor, Software Engineering	<i>Mar 2016 - Aug 2020</i>
<i>Jeonbuk National University</i> , Jeonju, Jeollabuk Do, Republic of Korea	
<ul style="list-style-type: none"> • <i>magna cum laude</i> (GPA: 3.98/4.50)

AWARDS & SCHOLARSHIPS

Innovation Award, Yonsei University (Best paper in Dept. of Artificial Intelligence) [link]	Jul 2022
Best Paper Awards in the 23rd Korea Conference on Software Engineering (KCSE 2021)	Feb 2021
Best Paper Awards in Dep. of Software Engineering	Dec 2019
Best Paper Awards, Korean Institute of Information Technology	Jun 2019
The National Scholarship for Science and Engineering, KOSAF(Korea Student Aid Foundation)	2018-2019
<ul style="list-style-type: none"> This scholarship supports undergraduates with strong academic performance in science and engineering, with the purpose of developing future leaders in those fields. 	
Academic Excellent Scholarship	2016-2019

TALKS

Talk on 1st Seminar held by Graph User Group (GUG)	<i>Jun 2023</i>
Invited talk on Top-conference session, Korea Computer Congress (KCC 2023) [slides]	<i>Jun 2023</i>
Talk on 2023 KSIAM AI Winter School, held by Korean Society for Industrial and Applied Mathematics (KSIAM)[slides][website]	<i>Feb 2023</i>
Talk on 1st Workshop on AI held by Yonsei Univ. [slides][poster]	<i>Oct 2022</i>
Poster presentation for AIGS Symposium 2022 held at the COEX Grand Ballroom [poster]	<i>Aug 2022</i>
Invited talk on Top-conference session, Korea Computer Congress (KCC 2022) [slides]	<i>Jul 2022</i>
Tutorial on Korea Artificial Intelligence Association (KAIA)	<i>Nov 2021</i>
<ul style="list-style-type: none">• Topic: “Graph-based Collaborative Filtering and Neural ODEs”• This talk is part of a tutorial called “Deep Learning Inspired by Differential Equation” [slides].

- Reviewer in AAAI 2023
- Reviewer in Applied Artificial Intelligence
- Reviewer in KDD 2023
- Reviewer in Learning on Graph Conference (LoG) 2022, 2023
- Reviewer in IEEE Transactions on Intelligent Transportation Systems
- Reviewer in ICDM 2021, 2022

PATENT AND S/W PROGRAM

[Issued Patent] Apparatus and Method for Processing Spatiotemporal Data Based on Graph Neural Controlled Differential Equations, Noseong Park, Jeongwhan Choi , Jeehyun Hwang, Hwangyong Choi, U.S.A. Patent(Issued Number: 18/085,109). 2022.12.20	<i>Dec 2022</i>
[Issued Patent] Apparatus and Method for Processing Spatiotemporal Data Based on Graph Neural Controlled Differential Equations, Noseong Park, Jeongwhan Choi , Jeehyun Hwang, Hwangyong Choi, Domestic Patent(Issued Number: 10-2022-0151819). 2022.11.14	<i>Nov 2022</i>
[S/W] LT-OCF: Learnable-Time ODE-based Collaborative Filtering, Korea Copyright Commission, C-2021-052779, 2021.12.	<i>Dec 2021</i>
[Issued Patent] Apparatus and Method for Collaborative Filtering Based on Learnable-Time Ordinary Differential Equation, Noseong Park, Jeongwhan Choi , Jinsung Jeon, Japan Patent(Issued Number: 2021-215162). 2021.12.28	<i>Dec 2021</i>
[Issued Patent] Apparatus and Method for Collaborative Filtering Based on Learnable-Time Ordinary Differential Equation, Noseong Park, Jeongwhan Choi , Jinsung Jeon, U.S.A. Patent(Issued Number: 17/563,726). 2021.12.28	<i>Dec 2021</i>
[Issued Patent] Apparatus and Method for Collaborative Filtering Based on Learnable-Time Ordinary Differential Equation, Noseong Park, Jeongwhan Choi , Jinsung Jeon, Domestic Patent(Issued Number: 10-2021-0177928). 2021.12.13	<i>Dec 2021</i>
[Granted Patent] Apparatus and Method for Measuring Difficulty Level of Chinese Character Using Regression Analysis, Suntae Kim, Jeongwhan Choi , Jiwoo Noh, Domestic Patent(Application Number:10-2019-0141339). 2019.11. [link]	<i>Nov 2019</i>

SKILLS

Tools & Technologies,

- PyTorch, TensorFlow, Python
- Java, C/C++, R, LaTeX, VBA, Unified Modeling Language
- Android, Matlab, Git, RSA
- MySQL, Tomcat, JSP, HTML, Javascript, JUnit

Industry Knowledge,

- Artificial Intelligence, Graph Neural Networks, Neural Ordinary Differential Equations (Neural ODEs), Recommender Systems, Time-series Forecasting, Spatio-temporal Forecasting, Software Defect Prediction
- Software Engineering, Object Oriented Programming, Design Pattern, Compiler, Software Testing(Static Analysis)
- Text Mining, Image Processing for SAR Image
- ARM Cortex-M3, ESP-8266

PROJECTS (FROM 2017 TO 2019)

Prediction for Configuration Bug Report Using Text Mining <ul style="list-style-type: none">• The purpose of this project is to predict the configuration bug reports using machine learning techniques and NLP.	<i>Nov 2019 - Dec 2019</i>
Development of capability assessment evaluation algorithm for personalized self-study with Hanja-Chinese parallel <ul style="list-style-type: none">• The purpose of this project is to solve the problems of existing Hanja character difficulty selection method.• It includes the technique for measuring the difficulty of Hanja characters using artificial intelligence.• It also covers personalized learning induction technique using a clustering model.	<i>Dec 2018 - Expected Nov 2019</i>
Stock Price Prediction Model Based LSTM to Maximize Return on Investment <ul style="list-style-type: none">• The purpose of this project is to predict the long-term stock flow based on the AI prediction model and to derive meaningful ROI.• This project has a paper which is not submitted.• See project	<i>Oct 2018 - Dec 2018</i>
Advanced Lane Finding Project <ul style="list-style-type: none">• The goal is to find the lane line using advanced image processing techniques.• See project	<i>Jul 2018</i>

Vehicle Detection	<i>Jul 2018</i>
<ul style="list-style-type: none"> • The software pipeline using computer vision algorithms to detect vehicles in videos. • See project 	
Clone Driving Behavior	<i>Jun 2018</i>
<ul style="list-style-type: none"> • The goal is to clone driving behavior via the CNN model. • See project 	
Recipe Assistant App	<i>Apr 2018 - Jun 2018</i>
<ul style="list-style-type: none"> • The recipe assistant app which helps people to cook an easy way. This app was implemented by Android and improved by several design patterns. • See project 	
Tic-Tac-Toe game for LPC 1768	<i>Jun 2018</i>
<ul style="list-style-type: none"> • This project is the Tic-Tac-Toe Game using ARM Cortex-M3(LPC 1768) • See project 	
Lane Finding Project	<i>Mar 2018</i>
<ul style="list-style-type: none"> • The goal is to find the lane lines on the road. • See project 	
Iceberg Classifier	<i>Jan 2018</i>
<ul style="list-style-type: none"> • The goal is to create an image classification model that finds icebergs among SAR images collected by satellites. This project has a paper published in JICS. • See project 	
Helicopter Battle Game	<i>Apr 2017 - Jul 2017</i>
<ul style="list-style-type: none"> • This Java project includes the software engineering knowledges such as objective-oriented design, design patterns and so on. • See project 	
Smart Mailbox	<i>Sep 2017 - Dec 2017</i>
<ul style="list-style-type: none"> • The smart mailbox project played a role in helping people who forget offline mails through notifications to mobile phones. • See project
